

Lignite Research Program- Grant Round 98- Application Summaries						
Application Number	Application Title	Applicant	Project Duration	Summary of Project	Funding Requested	Total Project Cost
LRC-98-A	Advanced Processing of Coal and Coal Waste to Produce Graphite for Fast-Charging Lithium-Ion Battery Anode	Energy & Environmental Research Center (EERC)	36 Months	Develop a process to convert North Dakota Lignite Coal and coal waste into high-grade graphite for lithium-ion battery anodes and other industrial applications, creating value-added use for lignite while supporting economic diversification.	\$500,000	\$1,545,000
