

Outdoor Heritage Fund Grant Application

Instructions

After completing the form, applications and supporting documentation may be submitted by e-mail to ndicgrants@nd.gov. It is preferred that only electronic copies are submitted.

You are not limited to the spacing provided, except in those instances where there is a limit on the number of words. If you need additional space, please indicate that on the application form, answer the question on a separate page, and include with your submission.

The application and all attachments must be received by the application deadline. You may submit your application at any time prior to the application deadline. **Applicants are strongly encouraged to submit applications prior to the deadline for staff review in order ensure that proposals will be complete when submitted on deadline date.** Incomplete applications may not be considered for funding.

Please review the back of this form to determine project eligibility, definitions, budget criteria, and statutory requirements.

Project Name: Grazing Resiliency in North Dakota (GRND)

Name of Organization: North Dakota Natural Resources Trust (the Trust)

Federal Tax ID#: 36-3512179

Contact Person/Title: Eric Rosenquist/Conservation Program Coordinator

Address: 1605 East Capitol Avenue, Suite 101

City: Bismarck

State: ND

Zip Code: 58501

E-mail Address: eric@naturalresourcestrust.com

Web Site Address: www.ndnrt.com

Phone: 701.223.8501

List names of co-applicants if this is a joint proposal

MAJOR Directive:

Choose only one response

Directive A. Providing access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;

Directive B. Improving, maintaining and restoring water quality, soil conditions, plant diversity, animal systems and by supporting other practices of stewardship to enhance farming and ranching;

Directive C. Developing, enhancing, conserving and restoring wildlife and fish habitat on private and public lands; and

Directive D. Conserving natural areas and creating other areas for recreation through the establishment and development of parks and other recreation areas.

Additional Directive:

Choose all that apply

Directive A.

Directive B.

Directive C.

Directive D.

Type of organization:

State Agency

Political Subdivision

Tribal Entity

Tax-exempt, nonprofit corporation.

Abstract/Executive Summary.

Summarize the project, including its objectives, expected results, duration, total project costs and participants. (no more than 500 words)

In June 2022 the North Dakota Natural Resources Trust was awarded OHF funding to support the objectives of the Grazing Resiliency in the Bakken II Program (GRB2). Primary in these objectives was support for the development of conservation based grazing systems. Working with our broad coalition of delivery partners the funding available for these practices was quickly fully subscribed. We estimate at least \$750,000 in unfulfilled projects are currently waiting based on recent enquiries. As of May 1, 2025, all southern and western ND counties are in moderate to extreme drought (D0-D4 drought severity). Drought conditions going into 2025 in North Dakota will continue to motivate

landowners to adopt more resilient drought adapted practices which often include incorporating cross fencing and livestock water developments to support rotational grazing practices and extend grazing options. It is essential that grass-based agricultural use (i.e. grazing) be supported in times of environmental stress, such as drought, to retain our remaining grasslands.

This program builds on the successes of the Bakken Development and Working Lands Program (BDWLP), and the GRB program, by providing cost-share and technical advice for rotational grazing and other range management practices to landowners. Rotational grazing practices have long been known to support healthy rest intervals for grasslands, promote healthy livestock, increase management flexibility and provide a variety of grass structures for endemic species.

This program will be delivered with the assistance of a network of local Soil Conservation District's and other conservation partners. Landowners wishing to implement management practices to make their range more resilient will be assisted in the form of grazing management plans, cost-share on practices, as well as technical assistance needed to effectively implement these practices. Funding from the GRND program will be used to provide cost share support for practices such as fencing and water developments. Over the five-year duration of this grant, we anticipate servicing at least 50 landowners and impacting over 40,000 acres.

Project Duration: 5 years

Indicate the intended schedule for drawing down OHF funds.

- Year 1 – Work with SCD's, NRCS, and individual contractors to implement signed landowner agreements
- Year 2 – Work with SCD's, NRCS, and individual contractors to implement signed landowner agreements
- Year 3 – Work with SCD's, NRCS, and individual contractors to implement signed landowner agreements
- Year 4 – Work with SCD's, NRCS, and individual contractors to implement signed landowner agreements
- Year 5 – Complete final documentation and submission to OHF

Amount of Grant request: \$2,110,000

Total Project Costs: \$2,845,000

Note: in-kind and indirect costs can be used for matching funds.

Amount of Matching Funds: \$735,000

A minimum of 25% Match Funding is required. *Indicate if the matching funds will be in-kind, indirect or cash. Please provide verification that these matching funds are available for your project. Note that effective as of July 1, 2015 no State General Fund dollars can be used for a match unless funding was legislatively appropriated for that purpose.*

Amount of Match	Funding Source	Type of Match (Cash, In-kind or Indirect)
\$30,000	NDNRT	Cash- Grazing systems
\$20,000	NDNRT	Cash- Contracted Services
\$10,000	Ducks Unlimited	In-kind (program delivery)
\$25,000	NDNRT	In-kind (staffing)
\$650,000	Landowners	Cash

Certifications

X I certify that this application has been made with the support of the governing body and chief executive of my organization.

O I certify that if awarded grant funding none of the funding will be used for any of the exemptions noted in the back of this application.

Narrative

Organization Information – Briefly summarize your organization’s history, mission, current programs and activities.

Include an overview of your organizational structure, including board, staff and volunteer involvement. (no more than 300 words)

The Trust was created in 1986 and was originally called the North Dakota Wetlands Trust until 2000. The Trust’s mission is to preserve, restore, manage, and enhance wetlands and associated wildlife habitat, grasslands, and riparian areas in the state of North Dakota. The Trust achieves this mission by partnering with agricultural and conservation organizations to promote productive use of private agricultural lands and private property rights that result in enhancement and protection of private lands, to effectively use North Dakota's public lands both for agriculture and recreation, to promote good land use along urban river corridors, and to enhance the state's significant water resources. The Trust helps shape the landscape through its programs and does its best to help shape both public attitude and public policy to support natural resource protection.

The Trust is managed by a six-member board of directors. Three of the directors are appointed by the governor of North Dakota, one by the National Audubon Society, one by the National Wildlife Federation, and one by the North Dakota Chapter of The Wildlife Society. The North Dakota Game and Fish Department Director is an ex-officio member. The Trust has an Executive Director and four staff members.

From its inception, the Trust has played a role as facilitator between agricultural and conservation interests. In addition to facilitating and funding sound, on-the-ground conservation of natural resources, its goal is to identify common issues, create dialogue, and resolve conflicts.

Purpose of Grant – Describe the proposed project identifying how the project will meet the specific directive(s) of the Outdoor Heritage Fund Program

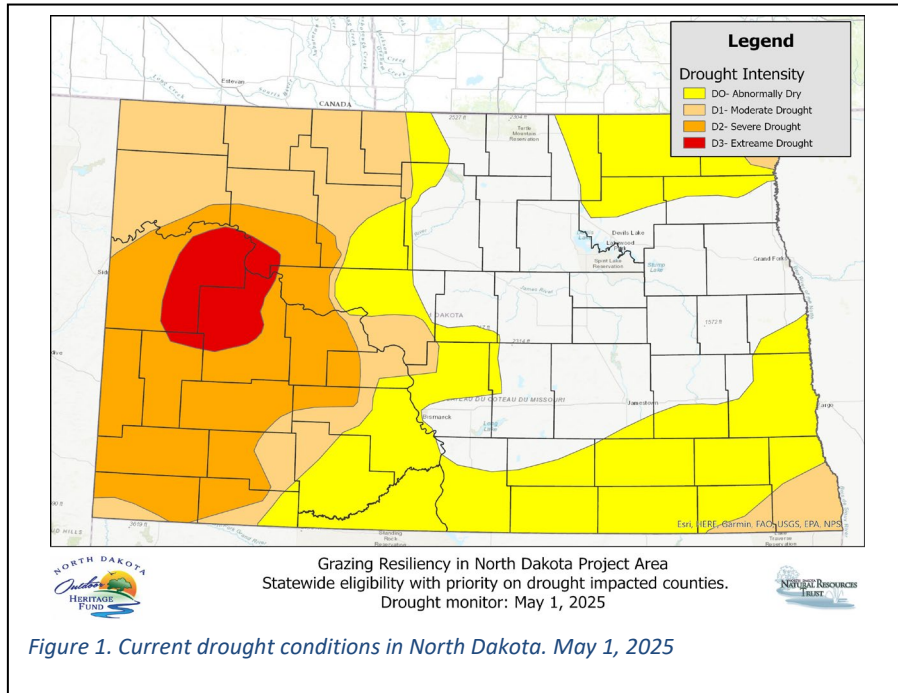

Identify project goals, strategies and benefits and your timetable for implementation. Include information about the need for the project and whether there is urgency for funding. Indicate if this is a new project or if it is replacing funding that is no longer available to your organization. Identify any innovative features or processes of your project. Note: if your proposal provides funding to an individual, the names of the recipients must be reported to the Industrial Commission/Outdoor Heritage Fund. These names will be disclosed upon request.

For tree/shrub/grass plantings: provide a planting plan describing the site design, planting methods, number of trees/shrubs by species and stock size, grass species and future maintenance. A statement certifying that the applicant will adhere to USDA-NRCS tree/shrub/grass planting specifications along with the name of the governmental entity designing the planting may be substituted for a planting plan.

For projects including Section 319 funding: provide in detail the specific best management practices that will be implemented and the specific projects for which you are seeking funding.

For projects including fencing: A minimum cost share of 40% by the recipient is preferred. Include detailed information on the type of fencing to be installed, whether funding is requested for boundary fencing, new or replacement of existing fencing, and/or cross fencing.

The previously approved BDWLP and GRB programs have been remarkably successful meeting their stated objectives of promoting and facilitating conservation-based range improvements in western North Dakota. The GRND program will provide a significant opportunity to broaden our reach to landowners throughout the state but particularly focused in drought impacted areas of western and southern ND (Figure 1).

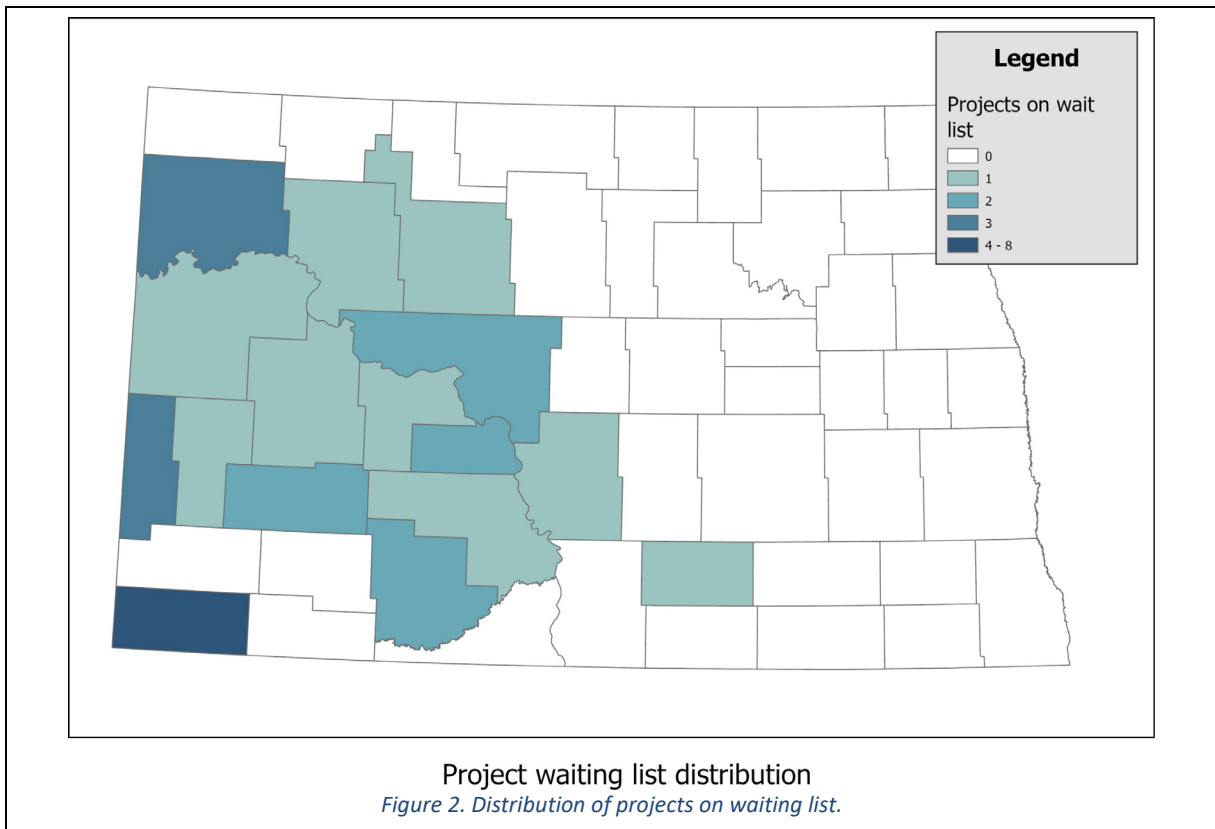

Due to extremely robust demand, all OHF funding to the BDWLP and GRB grants has been obligated. Because of the success of these and other programs, the Trust and our delivery partners constantly receive new requests for a range improvement cost share. We estimate that our waiting list of projects to be at least \$750,000 at this time (Figure 2). The need for continued funding for these activities is critical during this time of weather uncertainty. Other programs such as The ND State Water Commission’s

Drought Disaster Livestock Water Supply Project Assistance Program and the Natural Resources Conservation Service (NRCS) Environmental Quality Incentives Program (EQIP) both provide support for certain water developments. However, the State Water Commission is currently not active, and the program does not include grazing system components such as fencing for improved management options. Additionally, landowners must also have been denied in a previous application through another state conservation program to qualify. NRCS funding remains unclear during this period of federal budget cuts.

Through our network of partners, the Trust will promote the benefits of rotationally grazing grasslands and provide the tools for landowners to increase the resiliency of their grasslands, particularly in times of drought. (Directive B.) The Trust is committed to providing these services with landowner-friendly agreement terms and in an expedient manner, often moving a project from design phase to a signed agreement within a month.

Goals, Strategies, and Benefits: The goal of the GRND Program is to create and enhance working agricultural lands and wildlife habitat (Directive B) throughout the state but will prioritize drought impacted counties.

1. This project will provide cost-share for grazing developments on land within the project area. Water developments may include well developments (rehabilitation of existing wells included), water supply for private herds grazing on state or federal lands (as permitted), water pipelines, water tanks, and electric or solar power supply to operate wells. Fencing will be used to support new or enhancing existing rotational grazing systems which will enhance soil health and provide rest for native grassland pastures.

- By providing a grazing plan to landowners, SCD’s and other partners will have the opportunity to provide technical assistance to landowners through this program and other programs. Following the installation of infrastructure and implementation of practices, landowners will be better prepared to sustain their livestock operation during drought with a more resilient grazing system.

Is this project part of a Comprehensive Conservation Plan? Yes No

If yes, provide a copy with the application.

Note: Projects involving buildings and infrastructure will only be considered if part of a Comprehensive Conservation Plan. Please refer to the “Definitions” section at the back of the form for more details.

Management of Project – Provide a description of how you will manage and oversee the project to ensure it is carried out on schedule and in a manner that best ensures its objectives will be met.

Include a brief background and work experience for those managing the project.

The Trust will provide management, coordination, and administration to the GRND grant. The applicants will work collectively to provide landowners with program information to assist program participants.

The Trust will complete all coordination from our office located in Bismarck, ND. Brenda Newton, Administrative Assistant/Conservation Specialist, Terry Allbee, Biologist/Business Manager, Eric

Rosenquist, Conservation Program Coordinator, and Jesse Beckers, Energy Program Manager, will serve as the program coordinators. Trust staff have a combined 70 years of experience and a strong track record in delivering similar conservation projects. The Trust will provide tracking and reporting for all project agreements following grant guidelines.

Most direct contact with landowners will be made by county SCD's and other delivery partners. Landowners will be informed about practices offered by GRND as well as other agricultural infrastructure development options, such as conservation wildlife habitat, cover crops, grass plantings, and NDGFD PLOTS opportunities. Grant funds will be paid as development activities are completed and proper documentation is supplied to the Trust. GRND funding will be provided through continuous enrollment, meaning there will be no batching period and funding stops when the funds are contractually committed. If any prioritization is required to determine the best projects, local SCDs and other delivery partners will provide that oversight, utilizing input as needed. As stated previously, drought impacted areas will be prioritized. Our current waiting list already includes numerous projects which are anxiously waiting for the approval of this funding (Figure 2).

Evaluation – Describe your plan to document progress and results.

Please be specific on the methods you will utilize to measure success. Note that regular reporting, final evaluation and expenditure reports will be required for every grant awarded.

Projects will be monitored and reported in bi-annual reports to OHF. The final completion of individual projects will be performed by the Trust, SCD, or other delivery partners utilizing photographs and in-person verification of implemented developments. All projects will be entered into a GIS database for future reference and reporting data.

Financial Information

Project Budget – Use the table below to provide an itemized list of project expenses and describe the matching funds being utilized for this project.

*Indicate if the matching funds are in the form of cash, indirect costs or in-kind services. The budget should identify all other committed funding sources and the amount of funding from each source. **A minimum of 25% match funding is required.** An application will be scored higher the greater the amount of match funding provided. (See Scoring Form.)*

Certain values have been identified for in-kind services as detailed under “Budget Information” at the back of this form. Refer to that section and utilize these values in identifying your matching funds.

NOTE: No indirect costs will be funded. Supporting documentation for project expenses, including bids, must be included or application will be considered incomplete.

Project Expense	OHF Request	Applicant's Match Share (Cash)	Applicant's Match Share (In-Kind)	Applicant's Match Share (Indirect)	Other Project Sponsor's Share	Total Each Project Expense
Grazing Systems-Water	\$1,000,000.00	\$30,000.00	\$	\$	\$250,000.00	\$1,280,000.00
Grazing Systems-Fence	\$1,000,000.00	\$	\$	\$	\$400,000.00	\$1,400,000.00
Cultural Review	\$25,000.00	\$	\$	\$	\$	\$25,000.00
Contracted Services	\$60,000.00	\$20,000.00	\$10,000.00	\$	\$	\$90,000.00
Staffing	\$25,000.00	\$	\$25,000.00	\$	\$	\$50,000.00
	\$	\$	\$	\$	\$	\$
Total Costs	\$2,110,000.00	\$50,000.00	\$35,000.00	\$	\$650,000.00	\$2,845,000.00

Note: Costs for seeding, fencing, pipelines, wells, and cover crops cannot exceed NRCS Field Office Tech Guide without justification. Projects involving perimeter fencing must follow NRCS eligibility standards.

Budget Narrative – Use the space below to provide additional detail regarding project expenses.

○ Grazing Systems

The combined water and fence development support request is \$2,000,000 and will go towards cost of practice installation. The current NRCS Office Tech Guidelines for Allowable Cost will be used to estimate project costs at the time of contract execution. Fencing will be provided to landowners at 60% cost-share payment based on current NRCS cost-share payment rates. Landowners will provide the remaining 40% cost-share on fencing developments. The water developments will use NRCS rates for agreement development but will pay 75% cost-share based on actual costs. The landowners will provide the remaining 25% cost-share on water development. The Trust will provide additional cost-share (cash match) in the amount of \$30,000 for components that would be classified as equipment, such as portable power supplies, portable water delivery systems, and/or other unique grazing system practices.

○ Contracted Services- Cultural Review

The Cultural Review contracted services support request is \$25,000 and includes support for industry professionals and private consultants with experience in evaluating cultural resources. All projects will be initially reviewed by the State Historical Society of North Dakota-State Historical Preservation Office for potential cultural resource impacts and receive approval prior to project installation. If the project requires an on-the-ground cultural review, that activity will be outsourced to a qualified contractor. If funding remains unused, these funds will be applied toward additional grazing systems.

○ Contracted Services- Delivery

Through agreements with the Trust, individuals and agencies will be reimbursed for contracted project delivery services. Contractors will coordinate with landowners to view their property, offer planning and technical assistance, discuss contractual terms, and evaluate the sites at project completion. Any contracted services not utilized for the components described above will be applied toward additional grazing systems.

○ Staffing

The grant proposal requests \$25,000 in OHF funds over five years for staffing costs required to coordinate the completion of OHF required cultural resource requests as well as assist in project delivery, design and grant administration.

Sustainability – Indicate how the project will be funded or sustained in future years.

Include information on the sustainability of this project after OHF funds have been expended and whether the sustainability will be in the form of ongoing management or additional funding from a different source.

It is well established that producers with comprehensive grazing plans are better positioned to effectively manage unplanned events, such as drought. It is also well known that rotational grazing has positive impacts on the grasslands and the wildlife species that depend on them. Once these systems are in place they can be sustained for many years. Landowners will be asked to commit to maintaining the practices funded by this program for a period of 10 years.

Partial Funding – Indicate how the project will be affected if less funding is available than that requested.

Portions of the project could proceed with limited OHF funding. However, the landscape needs and opportunities identified by partners and the interest from landowners has exceeded the grant amount allocated in previous grants for grazing systems, and the Outdoor Heritage Fund can continue this unique partnership and accomplishments.

Partnership Recognition - If you are a successful recipient of Outdoor Heritage Fund dollars, how would you recognize the Outdoor Heritage Fund partnership? * There must be signage at the location of the project acknowledging OHF funding when appropriate.

The GRND program will recognize the OHF partnership in several formats. Those will include, but not be limited to, interactions with landowners, coordination meetings and outreach material. The OHF funding will be recognized in any outreach material, both published and electronically like web pages and social media. We will use social media in all forms to both advertise the program’s availability and tout its successes, noting the key role played by OHF funding. Where applicable, signs or other visual material may be placed on site to inform the public of the use of OHF funding. The OHF logo will also be included in all agreement materials.

Awarding of Grants - Review the appropriate sample contract for your organization on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm>.

Can you meet all the provisions of the sample contract? Yes No

If there are provisions in that contract that your organization is unable to meet, please indicate below what those provisions would be:

ABOUT OHF:

The purpose of the North Dakota Outdoor Heritage Fund is to provide funding to state agencies, tribal governments, political subdivisions, and nonprofit organizations, with higher priority given to projects that enhance **conservation** practices in this state by:

Directive A. Providing access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;

Directive B. Improving, maintaining and restoring water quality, soil conditions, plant diversity, animal systems and by supporting other practices of stewardship to enhance farming and ranching;

Directive C. Developing, enhancing, conserving and restoring wildlife and fish habitat on private and public lands; and

Directive D. Conserving natural areas and creating other areas for recreation through the establishment and development of parks and other recreation areas.

EXEMPTIONS

Outdoor Heritage Fund grants may not be used to finance the following:

- Litigation;
- Lobbying activities;
- Any activity that would interfere, disrupt, or prevent activities associated with surface coal mining operations; sand, gravel, or scoria extraction activities; oil and gas operations; or other energy facility or infrastructure development;
- The acquisition of land or to encumber any land for a term longer than twenty years; or
- Projects outside this state or projects that are beyond the scope of defined activities that fulfill the purposes of Chapter 54-17.8 of the North Dakota Century Code.

OHF funds may not be used, except after a finding of exceptional circumstances by the Industrial Commission, to finance:

- A completed project or project commenced before the grant application is submitted;
- A feasibility or research study;
- Maintenance costs;
- A paving project for a road or parking lot;
- A swimming pool or aquatic park;
- Personal property that is not affixed to the land;
- Playground equipment, except that grant funds may be provided for up to 25% of the cost of the equipment not exceeding \$10,000 per project and all playground equipment grants may not exceed 5% of the total grants per year (see Definitions/Clarifications for how this will be calculated);
- Staffing or outside consultants except for costs for staffing or an outside consultant to design and implement an approved project based on the documented need of the applicant and the expenditures may not exceed 5% of the grant to a grantee if the grant

exceeds \$250,000 and expenditures may not exceed 10% of the grant to a grantee if the grant is \$250,000 or less (see Definitions/Clarifications for how this will be calculated);

- A building except for a building that is included as part of a comprehensive conservation plan for a new or expanded recreational project (see Definitions/Clarifications for definition of comprehensive conservation plan and new or expanded recreational project); or
- A project in which the applicant is not directly involved in the execution and completion of the project.

The goal of the Industrial Commission is that at a minimum 15% of the funding received for a biennium will be given priority for recreation projects that meet Directive D.

The following projects are not eligible for funding, unless there is a finding of exceptional circumstances by the Industrial Commission include:

- Construction or refurbishment of indoor/outdoor ice rinks,
- Construction or refurbishment of indoor/outdoor athletic courts and sports fields,
- Other substantially similar facilities.
- Infrastructure that is not part of a comprehensive conservation plan.
- Projects not meeting a minimum funding request of \$2,500.

Budget Information

In-kind services used to match the request for Outdoor Heritage Fund dollars shall be valued as follows:

- Labor costs \$15.00 an hour
- Land costs Average rent costs for the county as shown in the most recent publication of the USDA, National Agricultural Statistics Services, North Dakota Field Office
- Permanent Equipment Any equipment purchased must be listed separately with documentation showing actual cost. (For example: playground equipment)
- Equipment usage Actual documentation
- Seed & Seedlings Actual documentation
- Transportation Mileage at federal rate
- Supplies & materials Actual documentation

More categories will be added as we better understand the types of applications that will be submitted. We will use as our basis for these standards other State and Federal programs that have established rates. For example, the North Dakota Nonpoint Source Pollution Management Program has established rates. If your project includes work that has an established rate under another State Program, please use those rates and note your source.

Definitions/Clarifications:

Building - Defined as "A structure with a roof either with walls or without walls and is attached to the ground in a permanent nature."

Comprehensive Conservation Plan - Defined as "A detailed plan that has been formally adopted by the governing board which includes goals and objectives--both short and long term, must show how this building will enhance the overall conservation goals of the project and the protection or preservation of wildlife and fish habitat or natural areas." This does not need to be a complex multi-page document. It could be included as a part of the application or be an attachment.

New and Expanded Recreational Project means that the proposed building cannot be a replacement of a current building. The proposed building must also be related to either a new or expanded recreational project--either an expansion in land or an expansion of an existing building or in the opportunities for recreation at the project site.

Playground equipment calculation - Only the actual costs of the playground equipment (a bid or invoice showing the amount of the equipment costs must be provided) - cannot include freight or installation or surface materials or removal of old equipment, etc.

Staffing/Outside Consultants Costs - If you are requesting OHF funding for staffing or for an outside consultant, you must provide information in your application on the need for OHF funding to cover these costs. For example, if you are an entity that has engineering staff you must explain why you don't have sufficient staff to do the work or if specific expertise is needed or whatever the reason is for your entity to retain an outside consultant. If it is a request for reimbursement for staff time then a written explanation is required in the application of why OHF funding is needed to pay for the costs of that staff member(s)' time. **The budget form must reflect on a separate line item the specific amount that is being requested for staffing and/or the hiring of an outside consultant.** This separate line item will then be used to make the calculation of 5% or 10% as outlined in the law. Note that the calculation will be made on the grant less the costs for the consultant or staff.

Maintenance – Activities that preserve or keep infrastructure in a given existing condition, including repairs. Repair means to restore to sound condition after damage, to renew or refresh; except repairs due to damage caused by Acts of God.

Scoring of Grants

Oral Presentation. Please note that you will be given an opportunity to make a ten-minute Oral Presentation at a meeting of the Outdoor Heritage Fund Advisory Board. These presentations are strongly encouraged.

Open Record. Please note that your application and any attachments will be open records as defined by law and will be posted on the Industrial Commission/Outdoor Heritage Fund website.

All applications will be scored by the Outdoor Heritage Fund Advisory Board after your ten-minute oral presentation. The ranking form that will be used by the Board is available on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm> .

Awarding of Grants

All decisions on requests will be reported to applicants no later than 30 days after Industrial Commission consideration. The Commission can set a limit on duration of an offer on each application or if there isn't a specific date indicated in the application for implementation of the project, then the applicant has until the next Outdoor Heritage Fund Advisory Board regular meeting to sign the contract and get the project underway or the commitment for funding will be terminated and the applicant may resubmit for funding. Applicants whose proposals have been approved will receive a contract outlining the terms and conditions of the grant.

Responsibility of Recipient

The recipient of any grant from the Industrial Commission must use the funds awarded for the specific purpose described in the grant application and in accordance with the contract. The recipient cannot use any of the funds for the purposes stated under Exemptions on the first page of this application.

If you have any questions about the application, the Commission can be reached at 701-328-3722 or ndicgrants@nd.gov.

Revised: November 4, 2019, April 12, 2023

May 6, 2025

North Dakota Industrial Commission
ATTN: Outdoor Heritage Fund Program
State Capitol – Fourteenth Floor
600 East Boulevard Ave., Dept. 405
Bismarck, ND 58505

RE: North Dakota Natural Resources Trust project Grazing Resiliency in North Dakota (GRND)

Our Local Pheasants Forever (PF) Chapter 619 in Williston, ND, supports North Dakota Natural Resources Trust's project Grazing Resiliency in North Dakota. We in Northwest North Dakota want to be able to partner with NDNRT on sorely needed projects in our area, especially Williams County. We recently contacted them to jointly work on a project involving ND State Trust Lands in Williams County, but they were out of funding. The GRND2 proposal will help that Partnership between NDNRT and our Local PF Chapter restore, enhance, and conserve grassland habitat.

On a local and direct level our Chapter is working to carry out PF's mission to conserve pheasants and other wildlife through habitat improvements, public access, education, and conservation advocacy. In NW North Dakota that work will hinge upon our private land ranching community and public land stewards. We believe that this proposal will further NDNRT's ability to partner with us to facilitate grazing management on public and private lands. It is an innovative proven proposal that will help fill a gap in conservation program opportunities for ranchers and land managers in our area.

Through this cooperative work with NDNRT to improve habitat on our Grasslands and Rangeland we can more effectively carry out the mission common to both PF and NDNRT.

Sincerely,

Kent Reierson

Kent Reierson
Pheasants Forever Chapter 619 Habitat Committee Chair

Pheasants Forever Chapter 619

Williston, ND 58801.
