

Outdoor Heritage Fund Grant Application

Instructions

After completing the form, applications and supporting documentation may be submitted by e-mail to ndicgrants@nd.gov. It is preferred that only electronic copies are submitted.

You are not limited to the spacing provided, except in those instances where there is a limit on the number of words. If you need additional space, please indicate that on the application form, answer the question on a separate page, and include with your submission.

The application and all attachments must be received by the application deadline. You may submit your application at any time prior to the application deadline. **Applicants are strongly encouraged to submit applications prior to the deadline for staff review in order ensure that proposals will be complete when submitted on deadline date.** Incomplete applications may not be considered for funding.

Please review the back of this form to determine project eligibility, definitions, budget criteria, and statutory requirements.

Project Name	TMBCI Sky Chief Park Fish Cleaning Station Project
Name of Organization	Turtle Mountain Band of Chippewa
Federal Tax ID#	#450223071
Contact Person/Title	JJ Desjarlais, Natural Resources Director, TMBCI
Address	Box 900
City	Belcourt
State	North Dakota
Zip Code	58316
E-mail Address	desjarlaisjr.jeffrey@yahoo.com
Web Site Address (If applicable)	www.tmchippewa.com
Phone	701-477-2640

List names of co-applicants if this is a joint proposal

MAJOR Directive:

Choose only one response

- Directive A.** Providing access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;
- Directive B.** Improving, maintaining and restoring water quality, soil conditions, plant diversity, animal systems and by supporting other practices of stewardship to enhance farming and ranching;
- Directive C.** Developing, enhancing, conserving and restoring wildlife and fish habitat on private and public lands; and
- Directive D.** Conserving natural areas and creating other areas for recreation through the establishment and development of parks and other recreation areas.

Additional Directive:

Choose all that apply

- Directive A.**
- Directive B.**
- Directive C.**
- Directive D.**

Type of organization:

- State Agency
- Political Subdivision
- Tribal Entity
- Tax-exempt, nonprofit corporation.

Abstract/Executive Summary.

Summarize the project, including its objectives, expected results, duration, total project costs and participants. (no more than 500 words)

The Turtle Mountain Band of Chippewa proposes to construct a Fish Cleaning Station at Sky Chief Park. The Station will include a 20' x 24' heated facility and equipment with a basin rinse and grinder. Sky Chief Park is a hub for fishing, swimming, hiking, picnicking and other recreational activities along with tribally sponsored events such as fishing tournaments, canoe races, archery, hunter safety courses, gardening, wildlife viewing, etc.

The total amount requested from the ND Outdoor Heritage Fund is \$112,793 of which the tribe will contribute \$35,597 in cash for a total project budget of \$150,390. The tribal Natural Resources Department will maintain and provide an oversight of the Fish Cleaning Station.

Goal: To construct a 20' ft x 24' ft Fish Cleaning Station at Sky Chief Park that will include an enclosed facility & fish cleaning equipment that will be secured and maintained by park staff.

Objectives:

1. Prepare the site by grading, leveling and filling
2. Install water, sewer, and electricity to site
3. Construct 24' x 24' building including restroom
4. Purchase and install Barricuda Fish Cleaning equipment
5. Train natural resources staff on the usage of the equipment
6. Promote the Fish Cleaning Station Project through various media outlets
7. Continually monitor and maintain the Barricuda equipment & building.

Project Duration: 12 months (1 year)

Indicate the intended schedule for drawing down OHF funds.

At the end of Project Performance

Amount of Grant request: \$ 112,793

Total Project Costs: \$ 150,390

Note: in-kind and indirect costs can be used for matching funds.

Amount of Matching Funds: \$ 35,597

A minimum of 25% Match Funding is required. Indicate if the matching funds will be in-kind, indirect or cash. Please provide verification that these matching funds are available for your project. Note that effective as of July 1, 2015 no State General Fund dollars can be used for a match unless funding was legislatively appropriated for that purpose.

Amount of Match	Funding Source	Type of Match (Cash, In-kind or Indirect)
\$ 35,597	Turtle Mountain Band of Chippewa Tribal Gov't	Cash
\$		
\$		

Certifications

x I certify that this application has been made with the support of the governing body and chief executive of my organization.

x I certify that if awarded grant funding none of the funding will be used for any of the exemptions noted in the back of this application.

Narrative

Organization Information – Briefly summarize your organization’s history, mission, current programs and activities.

Include an overview of your organizational structure, including board, staff and volunteer involvement. (no more than 300 words)

The TMBCI Tribal Government oversees the Department of Natural Resources (NR) who manages the wildlife and fish, bison, parks and recreation, agricultural, and other natural & cultural resources on Turtle Mountain tribal lands. The NR Department employs a full-time staff and partners with local training programs such as Summer Youth, Adult Workforce Training, and Experience Works (tribal elders age 55 and over) to assist the NR throughout the year.

Mission Statement: The Turtle Mountain Band of Chippewa is committed to preserving and protecting the natural and cultural resources of the Turtle Mountain Indian Reservation for the benefit of present and future generations of tribal members and for those who visit our Reservation.

As a tribal nation, it is an obligation and duty to protect our natural resources. It is inherited within our traditional beliefs that have been passed down for generations. It is also critical that we pass down to our youth the importance of preserving our natural resources. This is best practiced through “holistic teachings” and the integration of educational and cultural programming, recreational and wellness activities, and outdoor experiential learning.

The tribe recently hired several Conservation Law Enforcement Officers (CLEO) who serve to enforce Fish & Wildlife codes and protect Natural Resources habitat areas on the reservation. The NR Department also is a host site for the tribal Green Thumb Program (elders 55 and over) and Tribal Youth Program that assist in a diverse range of activities such as: mowing, clear-cutting, gardening, planting flowers, building park benches and picnic tables, constructing garden containers, mentoring tribal youth during events, etc. .

Purpose of Grant – Describe the proposed project identifying how the project will meet the specific directive(s) of the Outdoor Heritage Fund Program

Identify project goals, strategies and benefits and your timetable for implementation. Include information about the need for the project and whether there is urgency for funding. Indicate if this is a new project or if it is replacing funding that is no longer available to your organization. Identify any innovative features or processes of your project. Note: if your proposal provides funding to an individual, the names

of the recipients must be reported to the Industrial Commission/Outdoor Heritage Fund. These names will be disclosed upon request.

For tree/shrub/grass plantings: provide a planting plan describing the site design, planting methods, number of trees/shrubs by species and stock size, grass species and future maintenance. A statement certifying that the applicant will adhere to USDA-NRCS tree/shrub/grass planting specifications along with the name of the governmental entity designing the planting may be substituted for a planting plan.

For projects including Section 319 funding: provide in detail the specific best management practices that will be implemented and the specific projects for which you are seeking funding.

For projects including fencing: A minimum cost share of 40% by the recipient is preferred. Include detailed information on the type of fencing to be installed, whether funding is requested for boundary fencing, new or replacement of existing fencing, and/or cross fencing.

The purpose of the TMBCI grant application is to construct a fish cleaning station that will include both the equipment and a 20' x 24' sq. ft. heated building. The enclosed facility is essential for security purposes as well to protect the equipment from harsh weather conditions, particularly in winter.

The Sky Chief Park property is accessible to tribal members and is ideally suited for Park development which will include facility and infrastructure improvements, fishing docks/piers, shoreline restoration, community restrooms, playground equipped with commercially safe equipment, atv trails, and other park amenities.

Sky Chief Park includes opportunities for fishing, walking and nature trails, swimming and water sports, individual and group picnic facilities, and wildlife viewing opportunities -- as these may be developed carefully within the context of an integrated stewardship and management plan.

Working collaboratively with the tribal tourism Director, the NR Director will promote the new Fish Cleaning Station in all available media campaigns and outlets.

Timeline:	Month 1-3	Survey site Heavy machinery site work Pre-order Fish Cleaning equipment Prepare quarterly progress report
	Months 4-6	Construct Fish Station facility Install Fish Cleaning equipment Prepare quarterly progress report
	Months 7-9	Install heat Install electrical outlets Install plumbing Prepare quarterly progress report

Months 10-12 Conduct training on usage of equipment
Prepare final summation progress report

Major benefits of the proposed Sky Chief Park Beachfront Beautification project:

1. Attract more fish enthusiasts to the Sky Chief Park complex.
2. Provide a safe and healthy environment.
3. Will keep our beachfront areas clean from fish waste.
4. Will have the capacity to provide educational training opportunities.

*Barricuda Fish Cleaning Equipment Description (from Company brochure)

Stations employing restaurant-capacity garbage disposals were once the industry standard. They are noisy, messy, take a long time to grind fish, use lots of water, and have high maintenance costs, but they are somewhat cheaper to buy. Many will not process certain fish (catfish and salmon, among others). They are so noisy that fishermen will fill their disposals before starting them, which overloads their motors and causes them to frequently fail.

About 10 years ago, QM&M decided to build fish cleaning stations employing JWC dual-shafted industrial grinders, which have since become the new industry standard (see our [installations map](#)). These Barracuda stations are not only quieter, nearly maintenance-free, and safer (because of their innovative inlet design), but also process fish wastes faster. Unlike disposals, grinders don't need water to process fish wastes—it's only needed to rinse the cutting boards and flush the drain—so our stations can be adjusted to use as little as 2 gallons per minute. Disposal-type stations use 8 to 10 GPM, for a much longer length of time per fish ([see our Fish Cleaning Station Selection/Comparison Guide](#)).

Barracuda stations feature our exclusive fish cleaning station control system, which allows you to independently specify how long the grinder and drain-flushing water will run, guards against motor overload, and provides daily, weekly, and cumulative usage statistics. Because it includes a motor controller that will accept either single or 3-phase 240VAC power, our customers never need to purchase an add-on, high-cost, high-maintenance rotary phase converters.

Is this project part of a Comprehensive Conservation Plan? Yes No

If yes, provide a copy with the application.

Note: Projects involving buildings and infrastructure will only be considered if part of a Comprehensive Conservation Plan. Please refer to the "Definitions" section at the back of the form for more details.

Management of Project – Provide a description of how you will manage and oversee the project to ensure it is carried out on schedule and in a manner that best ensures its objectives will be met.

Include a brief background and work experience for those managing the project.

The Sky Chief Park complex is managed by the tribal Natural Resources Department and is headed by Mr. Jeff Desjarlais, Jr (JJ). Mr. Desjarlais is spearheading the Fishing Cleaning Station project in collaboration with several key partners/stakeholders who have

been involved since the development phase of the project including the TMBCI Tribal Government and the TM BIA Agency.

The TMBCI Tribal Government (www.tmchippewa.com) provides a steady source of funding toward the tribal Natural Resources Department and oversees a diverse array of federal, state, and tribal programs on behalf of the tribe. A professional Financial Audit is conducted yearly. The Bureau of Indian Affairs (BIA) has trust responsibilities and provides funding for our Natural Resources including a Youth/Elder mentoring employment program.

The NR Department meet bi-weekly to discuss developmental efforts & implementation strategies in regard to the Sky Chief Park complex. During the meetings, conference calls and video chats are set up with a host of agencies that have contributed to the needs of the tribe's natural resources.

To assure project success, the NR Department is guided by several plans in relation to stewarding the tribe's natural resources including:

- TMBCI Sky Chief Park Management Plan – the tribal 1,313 acre park contains a relatively natural landscape that includes two lakes, a diversity of natural habitats and cultural features and provide opportunities for a range of nature based outdoor recreational activities. The mission of the Park is “to preserve the Sky Chief Park’s natural and cultural heritage values.”
- TMBCI Fish Management Plan 2018-2028 - a comprehensive plan developed with the support of US. Fish & Wildlife and conducted by fish management specialist –Samuel Hultberg and Josh Wert. The plan is an essential guide in monitoring the numerous tribal lakes and waterways located within the Turtle Mountain Band of Chippewa Reservation.

Evaluation – Describe your plan to document progress and results.

Please be specific on the methods you will utilize to measure success. Note that regular reporting, final evaluation and expenditure reports will be required for every grant awarded.

The Tribal Natural Resources Director (JJ) will ensure that the tasks and activities of the project are accomplished in an efficient and timely manner. The Tribal Government has assigned Mr. Ron Trottier, District II Councilman, to be liaison with the NR team and to assure the needs of the tribe are addressed.

A quarterly and yearly progress report will be prepared by the NR Director who will in turn disseminate it to the tribal council and BIA for review and discussion. These reports will include the level of progress made toward project objectives, timelines, and measurable outcomes. They will also formulate the basis for reporting to the North Dakota Outdoor Heritage Fund.

Financial Information

Project Budget – Use the table below to provide an itemized list of project expenses and describe the matching funds being utilized for this project.

Indicate if the matching funds are in the form of cash, indirect costs or in-kind services. The budget should identify all other committed funding sources and the amount of funding from each source. **A minimum of 25% match funding is required.** An application will be scored higher the greater the amount of match funding provided. (See Scoring Form.)

Certain values have been identified for in-kind services as detailed under “Budget Information” at the back of this form. Refer to that section and utilize these values in identifying your matching funds.

NOTE: No indirect costs will be funded. Supporting documentation for project expenses, including bids, must be included or application will be considered incomplete.

Project Expense	OHF Request	Applicant's Match Share (Cash)	Applicant's Match Share (In-Kind)	Applicant's Match Share (Indirect)	Other Project Sponsor's Share	Total Each Project Expense
Fish Cleaning Station	\$112,793	\$35,597	\$	\$	\$	\$150,390
	\$	\$	\$	\$	\$	\$
	\$	\$	\$	\$	\$	\$
	\$	\$	\$	\$	\$	\$
	\$	\$	\$	\$	\$	\$
Total Costs	\$112,793	\$35,597	\$	\$	\$	\$150,390

Note: Costs for seeding, fencing, pipelines, wells, and cover crops cannot exceed NRCS Field Office Tech Guide without justification. Projects involving perimeter fencing must follow NRCS eligibility standards.

Budget Narrative – Use the space below to provide additional detail regarding project expenses.

The TMBCI Natural Resources Department, with authorization of the tribal government, will begin working on the Fish Cleaning Station in early 2026 with the spring thaw. The tribal government has the capacity and equipment to conduct site work as well as install water, electricity, and a sewage drain field at the site.

The tribe will hire a tribally licensed construction contractor (using a standard bid solicitation process) to build the 20' x 24' facility. The contractor will be responsible for erecting the facility w/rest room and installing electrical and heat. The entrance, doors, and restroom will be ADA-compliant so that it is a handicapped-accessible facility.

The Barricuda Model 1 Fish Cleaning Station will be purchased from Quality Machine & Manufacturing based in Conway, AR. Company representatives will provide training on how to use and maintain the equipment. Grahams Island based in ND and Chamberlain, SD both use the Barricuda Models and have been pleased with the quality and performance.

Budget Breakdown

Fish Cleaning Station:

Equipment – Barricuda Model !	\$72,440
Delivery	\$ 3,950
Start-up assistance	\$ 2,000

Fish Cleaning Facility

20' x 24' ft steel structure (w/heating, water, septic & cement floor) \$150 per sq ft standard rate Turnkey building 480 sq ft @ 150/ft	\$72,000
--	----------

Total Budget \$150,390

Sustainability – Indicate how the project will be funded or sustained in future years.

Include information on the sustainability of this project after OHF funds have been expended and whether the sustainability will be in the form of ongoing management or additional funding from a different source.

The Natural Resources Office will continually seek any funding opportunities available to the tribe via federal, state, foundation, and private funding. This will involve being proactive and maintain strong working relationships with a multitude of agencies and organizations – locally, statewide, and nationally. The tribe operates under several adopted plans such as the natural resources and fish management plans.

Recent activities/accomplishments:

Belcourt Lake Rejuvenation Project – installation of new picnic arbors, restroom facility, docks, fencing around the playground, and a boat dock.

Belcourt Lake “Boy Scout Camp” Project – addition of amenities such as docks, restroom, and picnic arbors.

TMBCI Boat Access Project – 7 new docks currently under construction at the tribal manufacturing company, CTI-Metalworks. These will be placed at several lakes on the TM Reservation.

RV Park Development – met with engineering firm to conduct a cost analysis to determine budget needed for installing water, sewer, & electrical power to the RV park site.

Greenhouse Lab – purchased and erected a greenhouse that will be used for engaging youth and elders in gardening and horticulture.

Tribal Forestry – recently hired a tribally funded Forester focused on tribal forestry needs – now and into the future.

Tribal Fishery Specialist – the NR Director is budgeting for a new Fish Management Specialist position that is planned for FY 2026.

ATV Trails – the NR Dept. recently installed to new vault toilets and resurfaced the trail parking lot on the ATV that extends for over 8 miles and adjoins with other county trails. CTI-Metalworks is currently constructing several bridges to be placed on the trail.

Partial Funding – Indicate how the project will be affected if less funding is available than that requested.

Any financial shortfalls from projected budgets will be addressed by meeting with the Tribal Government to determine what tribal resources are available. The tribe has been very committed to the Natural Resources Department and has provided much financial support so that it can be well-equipped and staffed. The Department has taken on the role of being primary stewards of tribal lands and its vital resources that has nourished the TM Chippewa for generations and provided a wealth of recreational fish & wildlife opportunities.

It is essential the tribal government afford Native youth every opportunity to participate in natural resource educational and social programming to assure long term sustainability. Tribal members do not have to pay park entrance fees and most events initiated at the Sky Chief Park complex are free to the public.

Partnership Recognition - If you are a successful recipient of Outdoor Heritage Fund dollars, how would you recognize the Outdoor Heritage Fund partnership? * *There must be signage at the location of the project acknowledging OHF funding when appropriate.*

The Turtle Mountain Band of Chippewa has access to all local media such as the Turtle Mountain Times & Turtle Mountain Star newspapers, tribal radio KEYA-FM radio, and social media such as face book and you-tube. The tribe will take advantage of these opportunities and will assure that the ND Outdoor Heritage fund will receive recognition and promotional coverage within these media streams. A plaque recognizing the contributors to the project will be placed within the Fish Cleaning Station facility.

Awarding of Grants - Review the appropriate sample contract for your organization on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm>.

Can you meet all the provisions of the sample contract? X Yes

If there are provisions in that contract that your organization is unable to meet, please indicate below what those provisions would be:

ABOUT OHF:

The purpose of the North Dakota Outdoor Heritage Fund is to provide funding to state agencies, tribal governments, political subdivisions, and nonprofit organizations, with higher priority given to projects that enhance **conservation** practices in this state by:

Directive A. Providing access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;

Directive B. Improving, maintaining and restoring water quality, soil conditions, plant diversity, animal systems and by supporting other practices of stewardship to enhance farming and ranching;

Directive C. Developing, enhancing, conserving and restoring wildlife and fish habitat on private and public lands; and

Directive D. Conserving natural areas and creating other areas for recreation through the establishment and development of parks and other recreation areas.

EXEMPTIONS

Outdoor Heritage Fund grants may not be used to finance the following:

- Litigation;
- Lobbying activities;
- Any activity that would interfere, disrupt, or prevent activities associated with surface coal mining operations; sand, gravel, or scoria extraction activities; oil and gas operations; or other energy facility or infrastructure development;
- The acquisition of land or to encumber any land for a term longer than twenty years; or
- Projects outside this state or projects that are beyond the scope of defined activities that fulfill the purposes of Chapter 54-17.8 of the North Dakota Century Code.

OHF funds may not be used, except after a finding of exceptional circumstances by the Industrial Commission, to finance:

- A completed project or project commenced before the grant application is submitted;
- A feasibility or research study;
- Maintenance costs;
- A paving project for a road or parking lot;
- A swimming pool or aquatic park;
- Personal property that is not affixed to the land;
- Playground equipment, except that grant funds may be provided for up to 25% of the cost of the equipment not exceeding \$10,000 per project and all playground equipment grants may not exceed 5% of the total grants per year (see Definitions/Clarifications for how this will be calculated);
- Staffing or outside consultants except for costs for staffing or an outside consultant to design and implement an approved project based on the documented need of the applicant and the expenditures may not exceed 5% of the grant to a grantee if the grant

- exceeds \$250,000 and expenditures may not exceed 10% of the grant to a grantee if the grant is \$250,000 or less (see Definitions/Clarifications for how this will be calculated);
- A building except for a building that is included as part of a comprehensive conservation plan for a new or expanded recreational project (see Definitions/Clarifications for definition of comprehensive conservation plan and new or expanded recreational project); or
- A project in which the applicant is not directly involved in the execution and completion of the project.

The goal of the Industrial Commission is that at a minimum 15% of the funding received for a biennium will be given priority for recreation projects that meet Directive D.

The following projects are not eligible for funding, unless there is a finding of exceptional circumstances by the Industrial Commission include:

- Construction or refurbishment of indoor/outdoor ice rinks,
- Construction or refurbishment of indoor/outdoor athletic courts and sports fields,
- Other substantially similar facilities.
- Infrastructure that is not part of a comprehensive conservation plan.
- Projects not meeting a minimum funding request of \$2,500.

Budget Information

In-kind services used to match the request for Outdoor Heritage Fund dollars shall be valued as follows:

- Labor costs \$15.00 an hour
- Land costs Average rent costs for the county as shown in the most recent publication of the USDA, National Agricultural Statistics Services, North Dakota Field Office
- Permanent Equipment Any equipment purchased must be listed separately with documentation showing actual cost. (For example: playground equipment)
- Equipment usage Actual documentation
- Seed & Seedlings Actual documentation
- Transportation Mileage at federal rate
- Supplies & materials Actual documentation

More categories will be added as we better understand the types of applications that will be submitted. We will use as our basis for these standards other State and Federal programs that have established rates. For example, the North Dakota Nonpoint Source Pollution Management Program has established rates. If your project includes work that has an established rate under another State Program, please use those rates and note your source.

Definitions/Clarifications:

Building - Defined as "A structure with a roof either with walls or without walls and is attached to the ground in a permanent nature."

Comprehensive Conservation Plan - Defined as "A detailed plan that has been formally adopted by the governing board which includes goals and objectives--both short and long term, must show how this building will enhance the overall conservation goals of the project and the protection or preservation of wildlife and fish habitat or natural areas." This does not need to be a complex multi-page document. It could be included as a part of the application or be an attachment.

New and Expanded Recreational Project means that the proposed building cannot be a replacement of a current building. The proposed building must also be related to either a new or expanded recreational project--either an expansion in land or an expansion of an existing building or in the opportunities for recreation at the project site.

Playground equipment calculation - Only the actual costs of the playground equipment (a bid or invoice showing the amount of the equipment costs must be provided) - cannot include freight or installation or surface materials or removal of old equipment, etc.

Staffing/Outside Consultants Costs - If you are requesting OHF funding for staffing or for an outside consultant, you must provide information in your application on the need for OHF funding to cover these costs. For example, if you are an entity that has engineering staff you must explain why you don't have sufficient staff to do the work or if specific expertise is needed or whatever the reason is for your entity to retain an outside consultant. If it is a request for reimbursement for staff time then a written explanation is required in the application of why OHF funding is needed to pay for the costs of that staff member(s)' time. **The budget form must reflect on a separate line item the specific amount that is being requested for staffing and/or the hiring of an outside consultant.** This separate line item will then be used to make the calculation of 5% or 10% as outlined in the law. Note that the calculation will be made on the grant less the costs for the consultant or staff.

Maintenance – Activities that preserve or keep infrastructure in a given existing condition, including repairs. Repair means to restore to sound condition after damage, to renew or refresh; except repairs due to damage caused by Acts of God.

Scoring of Grants

Oral Presentation. Please note that you will be given an opportunity to make a ten-minute Oral Presentation at a meeting of the Outdoor Heritage Fund Advisory Board. These presentations are strongly encouraged.

Open Record. Please note that your application and any attachments will be open records as defined by law and will be posted on the Industrial Commission/Outdoor Heritage Fund website.

All applications will be scored by the Outdoor Heritage Fund Advisory Board after your ten-minute oral presentation. The ranking form that will be used by the Board is available on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm> .

Awarding of Grants

All decisions on requests will be reported to applicants no later than 30 days after Industrial Commission consideration. The Commission can set a limit on duration of an offer on each application or if there isn't a specific date indicated in the application for implementation of the project, then the applicant has until the next Outdoor Heritage Fund Advisory Board regular meeting to sign the contract and get the project underway or the commitment for funding will be terminated and the applicant may resubmit for funding. Applicants whose proposals have been approved will receive a contract outlining the terms and conditions of the grant.

Responsibility of Recipient

The recipient of any grant from the Industrial Commission must use the funds awarded for the specific purpose described in the grant application and in accordance with the contract. The recipient cannot use any of the funds for the purposes stated under Exemptions on the first page of this application.

If you have any questions about the application, the Commission can be reached at 701-328-3722 or ndicgrants@nd.gov.

Revised: November 4, 2019, April 12, 2023
