Tami Mertz, Park Board Member

MAJOR Directive: (select the Directive that best describes your grant request)*

Choose only one response

Directive A. Provide access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;

Directive B. Improve, maintain, and restore water quality, soil conditions, plant diversity, animal systems and to support other practices of stewardship to enhance farming and ranching;

Directive C. Develop, enhance, conserve, and restore wildlife and fish habitat on private and public lands; and

Directive D. Conserve natural areas for recreation through the establishment and development of parks and other recreation areas.

Additional Directive: (select the directives that also apply to the grant application purpose)*

Choose all that apply

Directive A. Provide access to private and public lands for sportsmen, including projects that create fish and wildlife habitat and provide access for sportsmen;

Directive B. Improve, maintain, and restore water quality, soil conditions, plant diversity, animal systems and to support other practices of stewardship to enhance farming and ranching;

Directive C. Develop, enhance, conserve, and restore wildlife and fish habitat on private and public lands; and

Directive D. Conserve natural areas for recreation through the establishment and development of parks and other recreation areas.

Type of organization: (select the category that describes your organization)*

State Agency

Political Subdivision

Tribal Entity

Tax-exempt, nonprofit corporation.

Project Name*

City Park Playground Equipment Upgrade

Abstract/Executive Summary.

An Executive Summary of the project stating its objectives, expected results, duration, total project costs and participants.*

Who we are: Anamoose Park Board

Where we are: Anamoose is located in central North Dakota at the intersection of US Hwy 52 and ND State Hwy 14 in the far southeastern corner of McHenry County.

What we need: New playground equipment for the city park.

Why we need it: **Objective** - The current playground equipment has not been upgraded since the early 1970s. There have been repairs made when needed and possible, and some equipment could not be repaired and was removed from the site for safety of the users. The last incident of equipment breakage was in November of 2014. The piece cannot be repaired and will be removed this spring of 2015 as weather permits. The playground equipment is very limited currently and it is much needed for the safety of everyone that uses the playground equipment.

Who supports us: The community and surrounding area support the goal of playground equipment upgrades as the Attachment A confirms by showing the many donations given to this project from concerned businesses and citizens of the area. Anamoose is a small community located in the southeast corner of McHenry County. Population is 245 per 2012 census.

The Park Board has a small annual budget (See Attachment B) to perform its green space duties, keeping Anamoose looking good for visitors and citizens alike. The duties performed include such tasks as lawn care, grooming and maintenance of the public green spaces, i.e. the City Park, the City Ball Diamond, the Veterans Memorial; and other duties as required and requested by the Anamoose City Council regarding upkeep of the public green spaces. The Park Board is concerned with the safety of the current playground equipment in the city park. The equipment has not been upgraded since the mid to late 1970s. The community is small, but growing and those families moving to our town have children, increasing the number of playground participants. Then there are the travelers with children throughout the spring, summer and fall months, camping for a few days or just stopping by for an afternoon rest and stretch break at the park.

Project Duration:* Midwest Playscapes, Inc., submitted the most desirable quote (Attachment C) for the project suggests five (5) days to complete the installation and clean up.

Amount of Grant request \$ 54,400

Total Project Costs \$* 86,135. to include prep work prior to installation.
Quote included for this work submitted by TM Construction, a local contractor. Attachment D
(Note that in-kind and indirect costs can be used for matching funds)

A minimum of 25% Match Funding is strongly encouraged.

Amount of Matching Funds \$* 31,735:

Please indicate if the matching funds will be in-kind, indirect or cash.

The amount listed above is over 25% and already collected and available for the project.

Source(s) of Matching Funds*

Please provide verification that these matching funds are available for your project.

The above-referenced Matching Funds are ready and available in a restricted savings account to be used only for the purpose of this project.

Certifications *

- I certify that this application has been made with the support of the governing body and chief executive of my organization.
- I certify that if awarded grant funding none of the funding will be used for any of the exemptions noted on Page 1 of this application.

Lori Schmaltz

Narrative

Organization Information – Briefly summarize your organization’s history, mission, current programs and activities. *

Include an overview of your organizational structure, including board, staff and volunteer involvement. (no more than 300 words)

The City of Anamoose formed a Park Board in 1906 with the only real tasks being keeping the park grounds mowed and clean of debris. In the 1930s trees and flower beds were established and some simple benches added. Volunteers were used to complete most of the work done up to this point. It was some time in the 1950s – 1960s that park needs were taken care of by submitting invoices to the City Board to be paid. The installation of playground equipment followed during the 1960s with the purchase of used equipment from the White Township School. Later and formal park board was elected and a budget established. The mission of today’s Park Board is to maintain safe, clean and beautiful public spaces for the community and visitors alike. Activities include camping opportunities and the ball field is a gathering point for the community to watch the kids play ball in the summer. There is a weekly Market Place which draws people from outside the community to enjoy food, games, vendors selling their homegrown/made items and more importantly the opportunity to visit with their neighbors.

Purpose of Grant – Describe the proposed project identifying how the project will meet the specific directive(s) of the Outdoor Heritage Fund Program *

Identify project goals, strategies and benefits and your timetable for implementation. Include information about the need for the project and whether there is urgency for funding. Please indicate if this is a new project or if it is replacing funding that is no longer available to your organization. Identify any innovative features or processes of your project.

The current Park Board hopes to be able to complete the installation of the new playground equipment by midsummer this year. It has been three (3) years of fundraising efforts and hard work above and beyond individual jobs and park board tasks, putting events together to make this goal a reality for the community. Because the old equipment is breaking down and beyond repair, the need is immediate. There have been no efforts in the past to replace/upgrade the playground equipment by previous boards. It is long overdue for the community.

Management of Project – Provide a description of how you will manage and oversee the project to ensure it is carried out on schedule and in a manner that best ensures its objectives will be met.*

Include a brief background and work experience for those managing the project.

The board members will be onsite daily during the installation to assist in any way needed and to assure the agreed upon project is fulfilled. Several members of the board have been involved in landscaping and plant installation at the park, as well as maintenance of park facilities and would be able to discern whether the project is being executed properly.

Evaluation – Describe your plan to document progress and results. *

How will you tell if the project is successful? Please be specific on the methods you will utilize to measure success. Note that regular reporting, final evaluation and expenditure reports will be required for every grant awarded.

The participation of children and their parents in using the playground will be the measurement for this project. The feedback received from the community and visitors will be the yardstick to measure success of this project.

Financial Information

ATTACHMENT: **Project Budget – Using the standard project budget format that is available on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm> , please include a detailed total project budget that specifically outlines all the funds you are requesting. Note that a minimum of 25% match funding is strongly encouraged.***

The project budget should identify all matching funds, funding sources and indicate whether the matching funds are in the form of cash or in-kind services. As noted on the standard project budget format, certain values have been identified for in-kind services. Please utilize these values in identifying your matching funds. **NOTE: No indirect costs will be funded.**

I certify that a project budget will be sent to the Commission*

Sustainability – Indicate how the project will be funded or sustained in future years. *

Include information on the sustainability of this project after all the funding from the Outdoor Heritage Fund has been expended and whether the sustainability will be in the form of ongoing management or additional funding from a different source.

With the present park board budget issues that arise can be addressed before they become so huge and intimidating for a small community. Maintenance will be the proactive practice for the future of this project.

Partial Funding – Indicate how the project will be affected if less funding is available than that requested. *

Without the OHF grant the project would be delayed to the disappointment of the board, but most importantly the community.

Partnership Recognition - If you are a successful recipient of Outdoor Heritage Fund dollars, how would you recognize the Outdoor Heritage Fund partnership? *

The Board a plaque to recognize OHF and other contributors to be displayed at the playground area.

Scoring of Grants

All applications will be scored by the Outdoor Heritage Fund Advisory Board after your ten-minute oral presentation. The ranking sheet(s) that will be used by the Board is available on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm> .

Awarding of Grants*

All decisions on requests will be reported to applicants no later than 30 days after Industrial Commission consideration. Applicants whose proposals have been approved will receive a contract outlining the terms and conditions of the grant. Please note the appropriate sample contract for your organization on the website at <http://www.nd.gov/ndic/outdoor-infopage.htm> that set forth the general provisions that will be included in any contract issued by the North Dakota Industrial Commission. Please indicate if you can meet all the provisions of the sample contract. If there are provisions in that contract that your organization is unable to meet, please indicate below what those provisions would be. *

Responsibility of Recipient

The recipient of any grant from the Industrial Commission must use the funds awarded for the specific purpose described in the grant application and in accordance with the contract. The recipient cannot use any of the funds for the purposes stated under Exemptions on the first page of this application.

If you have any questions about the application or have trouble submitting the application, please contact Karlene Fine at 701-328-3722 or kfine@nd.gov

Option
 Deduct \$1,747 if the customer would like to Eliminate (7) Tree Toppers.

NOTE: The Freight above is estimated and subject to change due to the rising Fuel costs.

NOTE: UNLESS OTHERWISE NOTED, prices shown are material only. They DO NOT include: assembly, installation, border, safety surfacing, drain tile, geotextile fabric, removal of existing equipment, site preparation, excavation or site restoration, unloading of equipment, disposal of packaging material, storage of equipment, additional insurance and bonding would be extra, unless otherwise stated above. If playground equipment or materials are stored off site, customer is responsible for transporting equipment to job site.

Prices firm for 30 days, subject to review thereafter. Our terms are net 30. A finance charge of 1.5% will be imposed on the outstanding balance unpaid for more than 30 days after the shipment of materials. Equipment shall be invoiced separately from other services and shall be payable in advance of those services and project completion. Retainage not accepted. Once customer has signed quotation, your order cannot be changed or canceled. Please allow 3 to 4 weeks for delivery after receipt of order. Standard manufacturing design, specification, and construction apply unless noted otherwise. Customer is responsible for the identification of all underground utilities. Area must be accessible to Bobcat and other equipment necessary for installation or additional fees will be charged. Freight quote is based on customer unloading equipment and checking in all equipment for any missing parts. If product is refused by customer upon delivery for any reason (unless damaged), without prior authorization from Midwest Playscapes, Inc., the customer agrees to pay 20% restocking fee plus freight charges. Price does not include prevailing wages, unless otherwise noted. If we can be of Other Assistance, please feel free to contact us.

ASTM F1487

The lay-out for this custom playscape, design number 15-0787A, has been configured to meet the requirements of the ASTM F1487 standard. In addition, each of the above components listed as "Certified" have been tested and are IPEMA certified. Components listed as "Not Applicable" do not fall within the scope of the ASTM F1487 standard and have not been tested. IPEMA certification can be verified on the IPEMA website, www.ipema.org. In the interest of playground safety, IPEMA provides a Third Party Certification Service which validates compliance.

2010 ADA Standards for Accessible Design

The lay-out was also designed to meet the 2010 Standards published 15-Sep-2010, by the Department of Justice when installed over a properly maintained surfacing material that is in compliance with ASTM F1951 "Accessibility of Surface Systems Under and Around Playground Equipment" as well as ASTM F1292, "Impact Attenuation of Surfacing Materials Within the Use Zone of Playground Equipment", appropriate for the fall height of the structure.

Installation Times

Installation times are based on one experienced installer. A crew of three experienced individuals can perform the installation within the given time, each member working 1/3 of the given hours. [Eg. Installation Time = 30 hours. For a crew of three, each member will work 10 hours on the installation for a total of 30 hours on the project.]

Carbon Footprint

The CO2e (carbon footprint given in Kilograms and Metric Tons) listed above is a measure of the environmental impact this play structure represents from harvesting raw materials to the time it leaves our shipping dock. Playworld Systems nurtures a total corporate culture that is focused on eliminating carbon producing processes and products, reducing our use of precious raw materials, reusing materials whenever possible and recycling materials at every opportunity. Playworld Systems elected to adopt the Publicly Available Specification; PAS 2050 as published by the British Standards Institute and sponsored by Defra and the Carbon Trust. The PAS 2050 has gained international acceptance as a specification that measures the greenhouse gas emissions in services and goods throughout their entire life cycle.

Pre-Consumer Recycle Content

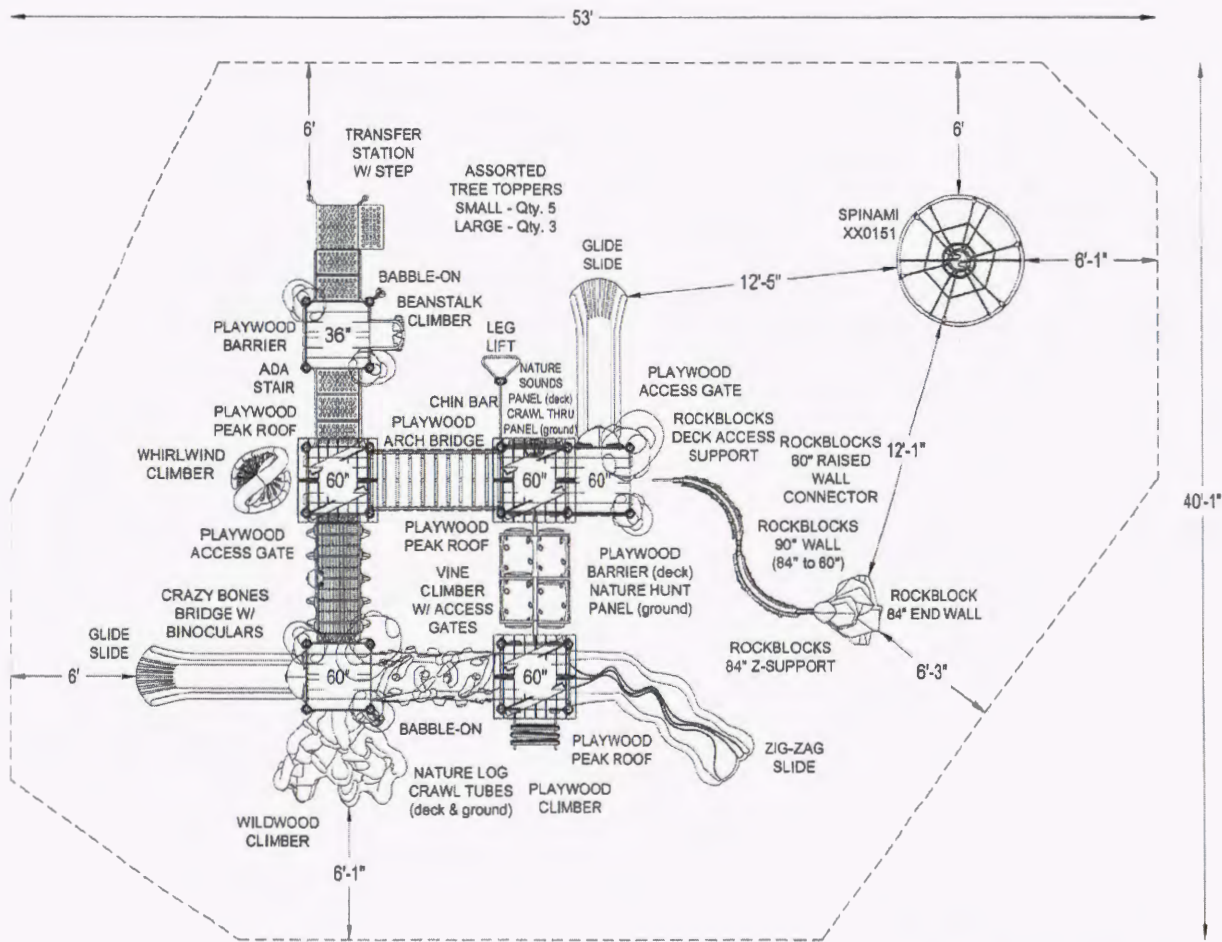

A measurement, in pounds, that qualifies the amount of material that was captured as waste and diverted from landfill during an initial manufacturing process and is being redirected to a separate manufacturing process to become a different product. E.g. 100% of our Aluminum Tubing is made from captured waste material during the manufacturing process of extruded Aluminum products such as rods, flat bars and H-channels.

Post-Consumer Recycle Content

A measurement, in pounds, that qualifies the amount of material that was once another product that has completed its lifecycle and has been diverted from a landfill as a solid waste through recycling and is now being used in a Playworld Systems' product. E.g. **20% to 40% of the steel in our steel tubing and sheet steel have been diverted from landfills. Automobiles are scrapped and recyclable steel is purchased by the steel mill that produces our raw product.

** The amount of Post-Consumer recycled steel fluctuates daily based on the availability of the recycled steel.

*PLAYGROUND SUPERVISION REQUIRED

MIDWEST PLAYSCAPES, INC.
500 Pine Street, Suite 104
Chaska, MN 55318

EQUIPMENT SIZE:
34'-2" x 28' x 19'

USE ZONE:
53' x 40'-1"

AREA: 1,809 SqFt. PERIMETER: 160 Ft.

FALL HEIGHT:
9 Ft.

USER CAPACITY: 82 AGE GROUP: 5-12

ADA SCHEDULE	Total Elevated Play Activities: 13		
	Total Ground-Level Play Activities: 7		
	Accessible Elevated Activities	Accessible Ground-Level Activities	Accessible Ground-Level Play Types
Required	7	4	3
Provided	13	5	4
