Financial Update

Please provide the following information regarding the funding for your project based on the contract award:

Total Funds Spent to Date

Match Funding \$126,000.00

In-kind Funding \$ 81,574.03

OHF Funding Received and Requested for Reimbursement \$ 126,000.00

Total Funding Expended to Date \$ 207,574.03

Balance of Grant Funds

OHF Funding remaining from initial payment: \$0

OHF Funding still to be Requested \$ 0

Total OHF Funding to be Expended on this Project \$ 126,000.00

The primary goal of the Sedimentation Reduction Project is to restore the aquatic life uses and to maintain the recreational uses of the Sheyenne River and its tributaries. The success of this project can be measured by the number of projects completed by our conservation minded producers along the Shevenne River corridor. Outdoor Heritage Funds were used as a 60% match for Best Management Practices installed to protect or enhance the water quality of the Sheyenne River.

Water sampling continues on 4 sites. Samples are taken 5 times per month, from April to the end of October. A total of 30 samples per year are analyzed by the NDDoH with a final report compiled at the end of the 319 project.

Work Completed from April 1, 2014 to July 31, 2015

	Life Span	Amount	Units	OHF Donation	Producer Match	Total BMP Cost
