NOTE; In-kind funding includes Corps of Engineers site prep and gravel expenses of \$59,000 and ND Game and Fish fish-cleaning table valued at \$1500. Breakdown attached.

*As appropriate please provide copies of receipts for purchases.

Work Completed during Period Covered by Report:

(This information will be posted on the Outdoor Heritage Fund/Industrial Commission website)

Site selected with input from local residents, Alternate site selected to be located farther away from cabin areas

Army Corps of Engineers completed studies and approved the alternate site.

Army Corps of Engineers obtained gravel and stockpiled it near the Cattail Boat Ramp. The site was then leveled and aggregate hauled to the site, by the Corps, for the parking area and fish cleaning station site located and staked.

A well was drilled and pump system installed to provide water to the station. Rural water system access was deemed too expensive because of the distance from South Central Rural Water lines to the alternate site. The well was installed by Northern Plains Drilling & Excavating. A 121' well was installed and tested at 30 plus GPM.

A 14 X 16 concrete slab 6 inches thick was installed by Kelsch Excavating, LLC

A 10 X 14 shelter was built by Jangula Construction Company.

Kem Electric installed electric transformer and meter located on the south side of the Cattail Bay Access Road

Jacks Electric trenched and bored the electrical service under the road and installed a service panel at the edge of the shelter. He later installed outlets and lights.

A used fish cleaning table was provided by the North Dakota Game and Fish Department. The table was installed and modified by Voices for Lake Oahe Board members.

A 24"X18" sign is on Order and will be installed as soon as it is complete.

Photos of work completed are welcome (If appropriate, please submit photos of key elements of the project completed or in progress during reporting period) Do not exceed five photos per project report.

This report was prepared pursuant to an agreement with the Industrial Commission of North Dakota, which partially funded the project through the Outdoor Heritage Fund. Project participants, its subcontractors, and the Industrial Commission of North Dakota, or any person acting on its behalf, do not:

- (A) *Make any warranty or representation, express or implied, with respect to the accuracy, completeness, or usefulness of the information contained in this report, or that the use of any information, apparatus, method, or process disclosed in this report may not infringe privately-owned rights; or*
- (B) *Assume any liabilities with respect to the use of, or for damages resulting from the use of, any information, apparatus, method or process disclosed in this report.*
