Final Report: 11/30/2025

## **OBJECTIVE/STATEMENT OF WORK:**

Restore scattered parcels of marginal or degraded farmland to productive grassland in counties west of the Missouri River along with the Three Affiliated Tribes and Standing Rock Sioux Tribal lands through the use of a Grassland Enhancement Incentive Payment (GEIP).

## STATUS:

The contract has been executed.

#### January 2022

The Bakken II program has been highly successful in providing opportunities for landowners during an especially difficult dry period, and several landowners have stated how grateful they are for the Outdoor Heritage Fund and the opportunities it provides. All funds in grazing systems were committed in the first four months of the program, as well as cover crops. There were few applications for native or tame grass seed. Signed agreements with the US Forest Service and Terracon to begin work 2022.

## August 2022

Grazing systems in Bakken II have continued to be implemented since contracts were signed in 2021. Due to improvement in drought conditions across the west, interest in grass seedings has increased and several have been planted. Projects with the US Forest Service and Grazing Associations has begun and is currently underway, with planned projects being completed. Our partnership with the Department of Mineral Resources and Terracon have also completed site investigations for reclamation.
